BOARDING CONS

Boarding can be stressful for any pet. Elderly pets are at a higher risk of complications caused by stress. Especially if they have not boarded before. If we notice your pet(s) exhibiting excessive stress we will notify you immediately. Although we provide special floor covers and check them daily, intact male dogs are at risk for scrotal skin irritation. If the pet has left our facility and any issues listed down below happen within 24 hours, you may contact our hospital and have a courtesy exam for your pet. This does not include services rendered to your pet(s).

- | | |
|----------------------------|------------------------|
| • Stomach Upset/Diarrhea | • Coughing/Sneezing |
| • Hot Spot/Skin Irritation | • Kennel Nose/Paw/Tail |

If any medical condition arises while your pet stays with us, a team member will reach out to emergency numbers on file immediately. If we can not get in contact with you, our veterinary team will assess the situation and provide necessary treatments and medications to your pet. **Initial Here** _____

PROPERTY DAMAGE

Wolftever Pet Wellness Group acknowledges that pets can become destructive due to boarding stress and being in a new environment.
